Раздел 4: Ознакомление с инструкцией по установке Zabbix

Вывод:

В ходе выполнения лабораторной работы была успешно развернута виртуальная машина с ОС Ubuntu в среде Oracle VM VirtualBox. Виртуальной машине были выделены необходимые ресурсы (2048 МБ ОЗУ, 2 ядра ЦП). Сетевой интерфейс был настроен в режиме «Сетевой мост», что обеспечило прямую сетевую связность между виртуальной машиной и основным ПК. Двусторонняя проверка связи (ping) подтвердила корректность настройки сети. Также была изучена официальная инструкция по установке Zabbix, что является подготовительным этапом для дальнейшего развертывания системы мониторинга. Цель работы достигнута.
